

Job Description-BIM360 Technician

U.S. CAD is a leading provider of software, services and support to the Architecture, Engineering and Construction (AEC) Industry. The BIM360 Technician role entails delivery of BIM360 related software, demonstration of other Autodesk Products, and continued growing knowledge of Construction specific software solutions. U.S. CAD will perform on-the-job training and coaching to help assist the growth of this team member in BIM360 and other related solutions

Candidates should be intimately familiar with construction process, specifically as it relates to the RFI/Change order procedures. BIM is at the core of our services to the AEC community and qualified candidates will understand the application of BIM within the Construction industry.

Major Responsibilities:

- Interact with sales team, technical team, and management to successfully implement Autodesk BIM360 software.
- Prepare and deliver remote (web-based) and on-site demonstrations of BIM360 products to clients.
- Assist in the development (scope and time estimates) of proposals with direction from sales and other team members
- Maintain knowledge of competing and complimenting solutions to BIM360
- Delivery of BIM360 training courses to customers.
- Establish a high level of confidence with U.S. CAD accounts, maintaining a strong customer service commitment to accounts of all sizes.
- Other duties and responsibilities that may be required to effectively support the needs of our customers, Autodesk and U.S. CAD.

Qualifications:

- High school diploma or GED and a minimum of 1-year of Autodesk BIM360 experience
- Delivered 6 or more BIM360 implementations
- Excellent analytical and problem-solving skills
- Communication and presentation skills and the ability effectively communicate with our clients and teammates.
- Proficient with Microsoft Word, PowerPoint, and Excel.
- Minimum of 2-years of Autodesk Revit, Navisworks, and Collaboration for Revit experience
- Understanding of Project Lifecycles, Construction processes, and project schedules
- Maintain a good working attitude and a desire to be a key member of the U.S. CAD team and make a difference in the Architecture, Engineering and Construction (AEC) Industry
- Ability to coordinate effectively when multiple project priorities are in conflict and provide viable solutions to internal and external customers

Preferred Qualifications:

- Associates or Bachelor's degree in a related field.
- Experience with Autodesk Forge and/or Dynamo
- 2-years or more of construction-related experience

Job Type: Full-time
